Stanford CS193p

Developing Applications for iOS
Spring 2020
Lecture 10

Today

⊚ All Demo All the Time

Very big demo today covering mostly topics related to presenting Views.

No concepts should be required to understand these, so we'll go straight to the demo!

As usual, these demos are just meant to introduce you to functionality in context.

You'll still need to read up in the documentation for the full story(ies).

Today

- Demo Topics

    .sheet

    .popover

    TextField

    Form

    More about Constraints and Gains via Grid enhancement

    Dismissing modally presented Views via @Bindings
